World of Cyber Security!

ACTIVE CARE DETECTION AND RESPONSE MANAGED SERVICE

Stop targeted attacks and advanced cyber threats and keep your business safe

Today, the majority of organizations, regardless of size or industry, have realized that Cybersecurity is a huge issue with a severe impact on operations.

Simultaneously, their IT staff is usually overwhelmed with the daily administration tasks and keeping systems running. Time is a luxury, and cybersecurity is often overlooked in favor of other priorities. New threats emerge constantly, and the growing sophistication of cyberattacks demands swift action and expertise. Many IT teams are struggling to do that, while many SMBs don't even have an IT team.

Effective pre-compromise threat prevention is the cornerstone of cybersecurity, but you can't rely on preventive measures alone to keep your business and its data safe from the Tactics, Techniques and Procedures adversaries use in targeted attacks. You need a solution that uses advanced analytics and machine learning technologies to shield your organization against advanced cyber threats and breaches.

With the EDR service, our security experts offer advanced threat identification and built-in guidance with the option to automate remote response actions. This way, we detect and stop targeted attacks quickly and efficiently at the very early stages.
The EDR service integrates seamlessly with our Endpoint Protection service and also with all major endpoint protection products.

SERVICE BENEFITS

- Unprecedented breach detection
- Response actions to mitigate the attack
- Operated by our security experts with minimum interaction and effort from you
- Most cost-effective solution
- You don't buy software, but pay as a service
- Stop whenever you like

NO ADMINISTRATION
This is a service managed entirely by Inter Engineering security experts. We monitor the security status of your systems, so you don't have to. In case of a cybersecurity emergency, we work together with your IT team or partner to eradicate the threat.

TARGETED RESPONSE
If a cyberattack is confirmed, our engineers can take immediate actions to remove the threat.

NETWORK ISOLATION
Depending on the severity of the attack, an endpoint can be automatically isolated from the network in order to stop the attacker from moving to other endpoints.

ADVANCED FORENSICS
Our engineers can gather artifacts of the breach in order to gain more insights of the mechanics of the attack.

NO HIDDEN COSTS
The service is subscription based and that's all you pay. We will not ask you to pay for extra features or better service levels.

REPORTING
On a regular basis, we will provide you with a report detailing all actions performed to protect your organization.

Managed Services are available through the Inter Engineering partner channel.
