

One Platform, Many Use Cases.

Enabling Every Company in the World with the Trust and Confidence to Make Smarter Cybersecurity Decisions

SecurityScorecard is the pioneer of Supply Chain Detection and Response (SCDR), helping thousands of organizations prevent supply chain breaches by enhancing the security posture of their organization and their suppliers. CISOs and security teams around the world turn to SecurityScorecard for help with managing cybersecurity risk, which is at the intersection of numerous internal and external threats - especially, in terms of operational, legal, compliance and reputational risk. Our comprehensive suite of solutions provides a true holistic view of risk and the resources to strengthen and protect your cyber risk posture across multiple use cases.

Learn how the #1 supply chain detection and response solution can help you.

Supply Chain Cyber Risk

Gain visibility into risks across your interconnected supply chain ecosystem to address issues before they escalate. Quickly detect zero-days, eliminate friction in vendor collaboration, and enhance your supply chain's cybersecurity.

Threat Landscape

Cut-through-the-noise to validate your digital footprint, prioritize critical risk, quickly mitigate threats, and fortify your ecosystem for future breaches.

Security and Risk Operations

Leverage actionable recommendations for you and your vendors to strengthen your network and remediate supply chain threats.

Cyber Insurance

Accurately assess the security posture of insureds and continuously monitor your portfolio. Leverage the largest network of rated companies to accelerate the time to quote, enhance cyber risk modeling, and provide value-added services to your clients.

Cyber Due Diligence

Gain insight into the cyber risk of any company, make data driven business decisions, and reduce financial risk. Perform more in-depth due diligence on an acquisition target, for a credit underwriting decision, or for a financial trade, minimizing the risk of costly cyber-related mistakes.

Executive-Level Reporting

Effectively communicate your cybersecurity strategy and risk posture to the Board and C-Suite in an easy-to-understand ratings language. Align cybersecurity with business needs, report on your organization's performance, and demonstrate the efficacy and ROI of your cybersecurity programs.

Service Providers

Enhance your offering with valuable SecurityScorecard data. Whether you're a data service provider, managed service provider, or advisory service provider, leverage SecurityScorecard to provide more value to your clients.

Compliance

Enable cybersecurity compliance, audit remediation, and attestation with evolving regulations and industry standards. Instantly map SecurityScorecard ratings to industry frameworks, track changes, and build remediation plans to remain compliant with mandates.

Identify and resolve supply chain risks

Empower security teams to actively prevent third-party breaches by enhancing the security posture of both their organization and their suppliers.

Products

Third-party risk management

Continuously monitor third-party risk, identify vulnerabilities, and work with vendors to remediate critical issues with unrivaled security ratings and risk intelligence.

Automatic Vendor Detection

Avoid your vendors' problems becoming your own with the industry's most complete cybersecurity risk score for your 4th parties and entire supply chain.

Supply Chain Risk Intelligence

Prevent cyber attacks by reaching clear decisions from the industry's only global threat intelligence with context from your ecosystem.

Security questionnaires

Save time and gain a 360-degree view of your vendors with the only customizable questionnaire to automatically validate responses against cybersecurity hygiene.

Attack Surface Intelligence

Prevent cyber attacks by reaching clear decisions from the industry's only global threat intelligence with context from your ecosystem.

Cyber Resilience Services

Managed Services for SCDR (MAX)

Operationalize supply chain cybersecurity while optimizing resources and focus with managed services powered by human expertise, threat and vulnerability intelligence, and the latest technology.

Digital Forensics and Incident Response

Respond confidently and mitigate business interruptions from a cyber attack by partnering with industry-leading experts in digital forensic and incident response services—24x7.

Intelligence feeds

Power your SOC and threat intelligence teams with real-time context-rich raw data that reduces risk and bolsters your cyber defense capabilities.

Vulnerability Intelligence

Strengthen vulnerability prioritization and remediation with comprehensive insights into emerging vulnerabilities and tailored attack surface analysis for your organization.

External Attack Surface Management

Stay ahead of cyber threats by continuously monitoring your attack surface, benchmarking against industry peers, and integrating external cybersecurity capabilities with your SOC.

Cyber Risk Quantification

Be seen as a business leader and justify your security budget to the Board with the most scalable and actionable cyber risk quantification solution.

Marketplace

Optimize your security workflows and deliver intelligence everywhere you work with the largest ecosystem of integrated technology partners in cyber risk ratings.
